PROFILE

Full-stack engineer focused on Angular products across web, mobile and backend systems. I lead enterprise frontend delivery, modernize inherited applications and design Nx-based platforms with Ionic, NestJS and PostgreSQL. My work spans telecom, UN-related operations, medical SaaS, distribution and commerce.

PROFESSIONAL EXPERIENCE

Senior Front-End Developer Jun 2023 - Oct 2026
IC&I; · Damascus, Syria

- Re-architected inherited Angular frontends and delivered Tower Load Inventory and Workflow Automation to production.
- Built enterprise HR and operations interfaces with complex forms, business rules and multilingual requirements.
- Defined Nx workspace boundaries, API contracts and shared UI infrastructure with backend and product teams.

Founder & Full-Stack Engineer Ongoing
Nasaq · in collaboration with IC&I;

- Designed a multi-tenant medical SaaS with isolation enforced at the data-access layer.
- Built shared API contracts, dynamic forms and data views across Angular web, Ionic mobile, admin and landing applications.

Freelance Front-End Developer Apr 2021 - Present
Independent clients

- Delivered responsive Angular applications from requirements through client handover.

Shopify Developer May 2024 - Present
2GO Group & independent clients

- Customized Shopify themes and storefront experiences for German-market brands.

EDUCATION

Information Technology Engineering 2020 - Present
Syrian Virtual University

Information Technology 2018 - 2020
Damascus Training Center (UNRWA)

SELECTED PROJECTS

Nasaq · Medical SaaS — Founded and built a multi-tenant clinic platform across Angular, Ionic, NestJS, PostgreSQL and Prisma. The MVP runs core clinic workflows.

Mandoob · B2B distribution — Designed solution and frontend architecture for a web platform now in launch stage and a built Android app connecting distributors, field representatives and stores. mmapp.ici-sy.com

Tower Load Inventory · Syriatel — Rebuilt the inherited Angular frontend for tower equipment and capacity management; delivered to the client.

Workflow Automation System — Reworked an enterprise Angular frontend for configurable requests, approvals, forms and workflow templates; delivered.

UNDP Employee Management — Built Angular interfaces for enterprise HR operations, including complex forms and multilingual workflows.

School Management Platform — Structured an Nx and Angular workspace for a multi-area education platform.

Hülle 2GO · Shopify storefront — Customized a mobile-first German accessories store with product presentation and a responsive buying flow; finished and live.

Phone Parts 2GO · B2B Shopify — Developed a catalog and order workflow for wholesale customers; previous work, no longer active.

ReiseKoffer 2GO · B2C Shopify — Developed luggage catalog and product pages for the German market; previous work, no longer active.
